

Updated workflow (OIDC):
FlexMLS mobile app user enters their FlexMLS username:

Rather than seeing the FlexMLS password screen as you do today, you will instead see the Clareity login screen:

Username

tar.fbstest

☐ Save Username

Password

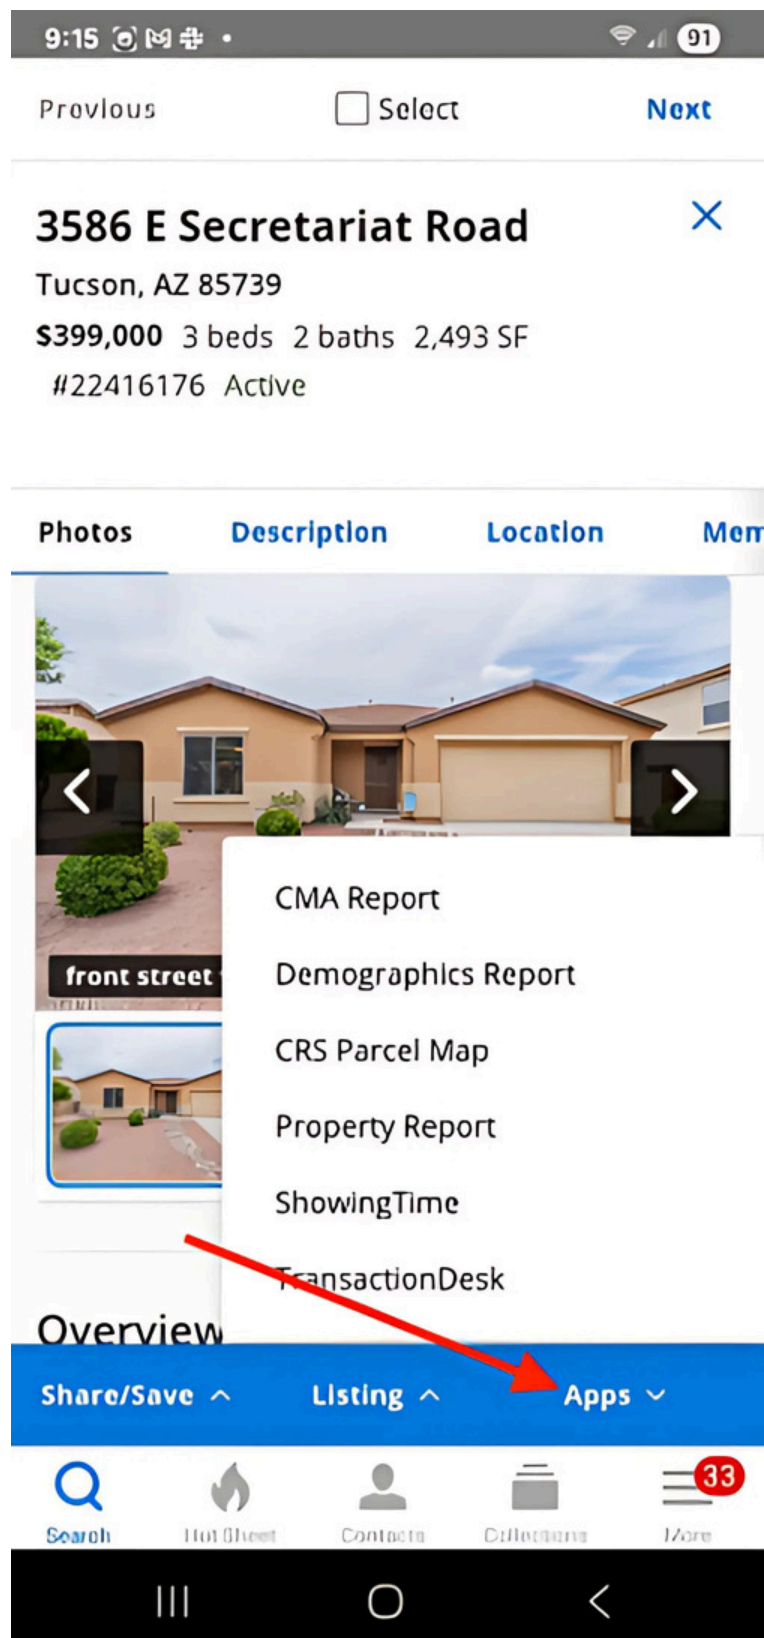

●●●●●●●●●●

[Forgot Password?](#)

 Login

Then, when you click on a third-party SSO integration, you won't see the Clareity login screen as an intermediate step. The process of initially logging into the Flexmls mobile app has already started a browser session, so the third-party SSO links go straight to the third party's product:

Third party integration
